Re: Undergraduate Research during Summer Session

As communicated on [March 26th](#) and [April 2nd](#), summer session will proceed as scheduled. However, because of the COVID-19 pandemic, all instruction will be offered remotely.

Laboratory research on-campus has been restricted to projects deemed as [critical research](#). Due to these restrictions, and to the need to suppress the spread of the CoV2 virus, summer sessions cannot include on-campus laboratory research for undergraduates.

Research activities that can be carried out remotely are encouraged so long as the undergraduate students can conduct all activities remotely and do not have to come to campus at any point.

S. David Kimball
